

PROFILE

I am a Full stack web developer with strong web development skills. I am interested in designing immersive and interactive Web apps, Native apps, and configuration AWS services to deploy APPs on the cloud. I have advanced problem-solving and leadership skills. Please visit my [LinkedIn](#), and my [GitHub](#) web apps.

SKILLS & TOOLS

Back-End & Databases:

- Node.js
- Express, body-parser, morgan
- JSON
- REST API
- Mongoose, schema, models
- MongoDB, Firebase

Front-End:

- HTML, CSS, Java Script (JS)
- Responsive Design
- Bootstrap Library
- jQuery
- React, React Native, Angular

Proficient in:

- Git, GitHub
- TDD, PWA
- Chrome Dev Tools
- Postman
- Android Studio
- Slack, Zoom, WhatsApp
- SCRUM (Trello)
- Unity, C#
- Maya, Photoshop
- Python
- Cloud Computing – AWS, AWS Lambda

Languages:

English (Fluent), Farsi (Native)

Interests:

Travelling, Music, Movies, Reading
Robots, Space, EV

EDUCATION

Full-Stack Web Development & Cloud Computing for Web Developers

CareerFoundry | Dubai, UAE | Jun 2023

- Intense project-based training program focused on Java Script, HTML, CSS and most prominent libraries, frameworks, and tools.
- 500+ hours of hands-on training with guidance of industry leading tutor and mentors.
- Selecting, preparing, and configuring the services needed to deploy applications on AWS.

B.S. Environmental Studies

Azad University | Yazd, Iran | May 2004

PROJECTS

Meet App

| [Code](#) | [Demo](#) |

- Develop a serverless, progressive web application with React using a TDD (Test Driven Development) technique using Google calendar API to fetch upcoming Full stack events.

myFlix App

| [Code](#) | [Demo](#) | [API](#) |

- Developed a server and client side movie application using **MERN** tech stack where users can register, login, and view list of movies from a database and add favorite movies to a list in their account.

myFlix – Angular

| [Code](#) | [Demo](#) | [API](#) |

- The client-side of a movie tracking app allowing users to create an account, access information about different movies and save them to their list of favorites. Users can also update their personal information and delete their account. MEAN.
- The technologies used for this app are Angular, Angular Material, TypeScript, and TypeDoc.

ChatMat

| [Code & Demo](#) |

- ChatMat has been created by React Native and designed to work on both Android/iOS mobile phones. The app provides users with a chat interface and options to share images and their location.
- The technologies used for this app are React-Native, Expo, and Google Firebase (Firestore Database).
